FOREWORD

The Labour force statistics are pivotal for manpower planning, human resource development and economic growth. Pakistan Bureau of Statistics is conducting Labour Force Surveys (LFS) since 1963. The scope of the survey was extended to Azad Jammu & Kashmir (AJ & K) in 1992-93. The Survey data is extensively used by the government, researchers and other stakeholders at large.

Although LFS data on AJ & K is accessible to the concerned indentors, this is the third time that annual estimates of LFS (2017-18) in Azad Jammu & Kashmir are presented in the shape of a separate report. The requisite information is collected from a representative sample of 3719 households to produce gender disaggregated estimates of the total area with urban/rural breakdown.

The Survey, along with the quantification of core variables, also estimates important attributes of literacy, migration, occupational safety, etc. The estimates are profiled according to latest classifications viz Pakistan Standard Industrial Classification (PSIC) 2010, based on ISIC rev-4 and Pakistan Standard Classification of Occupations (PSCO) 2015 based on ISCO-2008.

The preparation of the report of LFS 2017-18 will provide help to construct the time series of labour indicators along with regular annual publication of Pakistan Labour Force Survey. The officers and staff of PBS well deserve a lot of appreciation for setting this worthy precedent.

Effort is made to make this report a comprehensive, informative and useful document for the decision-makers, researchers, planners, economists and other beneficiaries at large. Suggestions for further improvement of the LFS are welcome.

SUMMARY OF FINDINGS

Main findings of AJ & K's LFS 2017-18 in comparison with the LFS 2014-15, parenthesized in the same order, are outlined as under:

- 1. Participation Rate** (22.9%) increase as compared to that of previous LFS 2014-15 (22.5%). Area and gender wise rates also go up. Participation rates in rural area (22.0%, 22.2%) and in urban areas (25.7%, 26.0%) increase almost the same points during the comparative periods. Also, the Labour Force participation rate of males (40.1%, 41.0%) and of females (3.9%, 5.9%) increase in 2017-18 as compared to LFS 2014-15. Male-female disparity seems to be narrowing down the time lane
- 2. Employment by Major Industries** indicates decline in the share of *wholesale & retail trade* (17.4%), *transport/storage & communication* (6.8%), *community/social & personal services* (27.3%) and *construction* (19.0%) scale down as compared to respective estimates of LFS 2014-15 (19.9%, 8.6%, 30.3%, 19.0%). *Agriculture & allied activities* (19.4%) and *manufacturing* (8.2%) gain steam in comparison with the earlier shares (10.9%, 5.9%) in the previous survey.
- 3. Employment Status** situates *employees* constitute the largest group (52.3%) followed by own account workers (40.9%), contributing family workers (6.5%) and employers (0.3%). Male share is more in the status of employees (52.4%) and own account workers (42.8%) as compared to female share in the same categories (51.3%) and (25.9%) respectively. Females contributing family workers (22.8%) are almost six times more than males contributing family workers (4.4%). As for change during the comparative periods, all categories seem to be declined except own account workers (37.3%, 40.9%) notches up during the comparative periods.
- 4. Unemployment Rate** (10.3%) fares a bit lower than that of the previous survey (11.2%). Similar configuration obtains in the case of males (9.4%, 8.4%) and in rural (11.4%, 10.1%) areas. However, in case of females the fall in the *unemployment rate* is more significant both in rural and urban areas.
- 5. Formal Sector wanes** (29.7%, 25.9%). Similar configuration obtains in case of males (26.6%, 23.0%) and females (69.5%, 54.2%). Area wise formal employment also suggest declining trend both in case of rural (29.1%, 24.9%) and in urban (33.0%, 28.5%) areas.
- 6. Informal Sector** accounts for more than seven-tenth (74.1%) of non-agricultural employment, more in rural (75.1%) than in urban areas (71.5%). On the other hand, formal sector activities are concentrated more in urban areas (28.5%) than in rural areas (24.9%). Females are more numerous in rural formal (55.6%) and less in urban formal (51.7%) while males are more numerous in rural informal (77.5%) than in urban informal (75.5%). Employment in Informal sector trend up while formal sector scale down during the comparative periods

SECTION-I

METHODOLOGY

Introduction

Pakistan Bureau of Statistics is carrying out Labour Force Survey (LFS) since 1963. The scope of the survey was extended to Azad Jammu & Kashmir (AJ & K) in 1992-93. Along the way, the questionnaire and methodology of the survey have undergone pertinent improvements to keep current with the best practices. The questionnaire was improved in 1995 to reckon with the size and composition of migration and informal sector. The scope of the survey was extended in 2001-02 to estimate the stock of occupational safety and health of employed persons. Last meeting of the Panel was held in 2013 to review the questionnaire and methodology of the LFS 2017-18. This is the 3rd report of LFS in AJ & K produced by this Bureau.

2. This report presents results of LFS 2017-18 carried out in AJ & K. The survey's sample size comprises 3,760 households enumerated through the four quarters of the year.

Objectives

3. The major aim of the survey is to collect a set of comprehensive statistics on the various dimensions of AJ & K's civilian labour force as a means to pave the way for skill development, planning, employment generation, assessing the role and importance of the informal sector and, sizing up the volume, characteristics and contours of employment. The broad objectives of the survey are as follows:

- To collect data on the socio-demographic characteristics of the total population i.e. age, sex, marital status, level of education, current enrolment and migration etc;
- To acquire current information on the dimensions of AJ & K labour force; i.e. number of persons employed, unemployed, and underemployed or out of labour market;
- To gather descriptive facts on the engagement in major occupational trades and the nature of work undertaken by the institutions/organizations;
- To profile statistics on employment status of the individuals, i.e. whether they are employers, own account workers, contributing family workers or paid employees (regular/casual);
- To classify non-agricultural enterprises employing household member(s) as formal and informal;
- To quantify the hours worked at main/subsidiary occupations;
- To provide data on wages and mode of payment for paid employees;
- To make an assessment of occupational health and safety of employed persons by causes, type of treatment, conditions that caused the accident/injury and time of recovery; and

- To collect data on the characteristics of unemployed persons i.e. age, sex, level of education, previous experience if any, occupation, industry, employment status related to previous job, waiting time invested in the quest for work, their availability for work and expectations for future employment.

Reference Period

4. Reference period is week i.e. seven days before the date of enumeration.

Field Operation

5. PBS is the national statistical organization responsible for collection, processing, compilation and dissemination of statistics. It has 34 Regional/Field Offices located all over Pakistan including AJ & K. These offices are equipped and manned with regular and trained field staff for the collection of data from the field.

6. In order to harmonize dynamics of field enumeration in line with the survey's objectives, training is imparted to the concerned staff on interviewing techniques and other procedure to be used in the enumeration. For quality control, supervisors from Regional/Field Offices and headquarter, make frequent field visits to keep the collection process on track.

Data Processing and Editing

7. Soon after data collection, the supervisors edit, check and clean the filled-in questionnaires manually for consistency and completeness and refer back to field where necessary.

8. Editing and coding is done at headquarter by the subject matter section. Computer edit checks are applied to correct errors identified at the stage of data entry. The relevant numerical techniques are used to eliminate erroneous data resulting from mistakes made during coding. The survey records are further edited and rectified through a series of computer processing stages.

Sampling Plan

9. *Universe* of this survey consists of all urban and rural areas of Azad Jammu & Kashmir. The military restricted areas of Azad Jammu & Kashmir are out of the scope for the survey.

Sampling Frame

10. *Urban Areas* Pakistan Bureau of Statistics (PBS) has developed its own sampling frame for both urban and rural domains. Each city/town is divided into enumeration blocks. Each enumeration block is comprised of 200 to 250 households on the average with well-defined boundaries and maps. The frame used in this survey was the most recent frame which is updated through Population and Housing Census 2017.

11. **Rural Areas:** The rural area frame consisting of list of blocks within villages /Mauzas. It was updated during House Listing Operation 2011 and then again updated under “Updation of Rural Area Frame” (URAF) Project upto 2015 and is used as Sampling Frame. Enumeration blocks are considered as Primary Sampling Units (PSUs) for urban and rural domains respectively.

Stratification Plan

12. **Urban and Rural Domain** populations of Azad Jammu & Kashmir has been treated as an independent and explicit stratum.

13. **Sample Size and its Allocation:** Keeping in view of the variability for the characteristics for which estimates are to be prepared, population distribution and main objectives of the survey, a sample of 3760 households has been considered appropriate to provide reliable estimates for population parameters within acceptable reliability limits. The entire sample of households (SSUs) is drawn from 276 Primary Sampling Units (PSUs) out of which 164 are urban and 112 are rural. The distribution of sample PSUs is given below:

Administrative Unit	PSSU (Blocks/Villages)			SSUs (Households)		
	Urban Blocks	Rural Villages	Total PSUs	Urban Households	Rural Households	Total Households
AJ & Kashmir	164	112	276	1968	1792	3760

14. **Sample Design:** A two-stage stratified sample design is adopted for this survey.

15. **Selection of Primary Sampling Units (PSUs):** Enumeration blocks in both Urban and Rural domains are taken as Primary Sampling Units (PSUs). Sample PSUs from each ultimate stratum/sub-stratum are selected with probability proportional to size (PPS) method of sampling scheme. In both Urban and Rural domains, the number of households in an enumeration block is considered as measure of size.

16. **Selection of Secondary Sampling Units (SSUs):** The listed households of sample PSUs are taken as Secondary Sampling Units (SSUs). A specified number of households i.e. 12 from each urban sample PSU and 16 from rural sample PSU are selected with equal probability using systematic sampling technique with a random start.

COEFFICIENT OF VARIATION (CVs) OF IMPORTANT VARIABLES

Characteristics/ Variables	Coefficient of Variation (Cvs) in Percentage		
	AJ & K	Urban	Rural
Total Persons	2.27	2.30	6.37
Employed Persons	3.20	3.53	7.44
Employed Persons in Formal Sector	5.47	7.01	7.55
Employed Persons in Informal Sector	3.85	4.32	8.39
Literacy Rates	1.08	1.28	1.95
Household Size	1.07	1.29	1.28
Sex Ratio	1.30	1.56	1.67

Method of Data Collection

17. Data are collected by direct interview method. Generally, the head of household is chosen to provide information about all members of the household. In case of his non-availability at the time of interview, some other informed member of the household down the line is interviewed. The total sample for the year is evenly distributed for enumeration on quarterly basis to offset the effect of seasonal variations. The information collected however relates to the week preceding the date of enumeration.

Coverage

18. The survey covers all urban and rural areas of AJ & K excluding the military restricted areas.

19. All sample enumeration blocks in urban areas and mouzas/dehs/villages in rural areas were enumerated except 41 households due to non contact and refusal cases in urban and rural areas. However, the number of sample households (3719) enumerated as compared to total sample size (3760) is high as response rate is 98.91%.

SECTION-II

CONCEPTS AND DEFINITIONS

A brief explanation of the key concepts and definitions follows.

1. ***Sex Ratio*** is the average number of males per 100 females.
2. ***Literacy rate*** expresses all those persons ten years of age and above who can read and write in any language with understanding, as percentage of the population ten years and above.
3. ***Level of education*** is categorized as follows:
 - i) ***Below Matric*** comprises less than ten (10) years of schooling.
 - ii) ***Matric but less than intermediate*** encompasses ten (10) to eleven (11) years of education.
 - iii) ***Intermediate but less than Degree*** entails twelve (12) to thirteen (13) years of education.
 - iv) ***Degree & above*** comprises fourteen (14) or more years of education.
4. ***Household*** constitutes all those persons who usually live together and share their meals. A household may consist of one person or more who may or may not be related to each other.
5. ***Economically Active Population*** comprises all persons of either sex who provide labour services for the production of goods and services as defined by the United Nation System of National Accounts, during the reference period. The production of goods and services includes:
 - i) all production and processing of primary products whether for the market, barter or, own consumption,
 - ii) the production of all other goods and services for the market,
 - iii) the households which produce such goods and services for the market and own consumption, and
 - iv) own account construction.
6. ***Currently Active Population*** or labour force comprises all persons ten years of age and above who fulfill the requirements for including among employed or unemployed during the reference period i.e. one week preceding the date of interview.

7. **Crude activity rate** is the currently active population expressed as a percentage of the total population in AJ & K.

8. **Refined activity rate** is the currently active population expressed as a percentage of the population 10 years and above. This rate enables international comparison by factoring in the effect of age composition.

9. **Augmented activity rate** is based on probing questions from the persons not included in the conventional measure of labour force to net-in marginal economic activities viz subsistence agriculture, own construction of one's dwelling etc. Conventionally, persons 10+ aged reporting housekeeping and other related activities are considered out of labour force. However, from the perspective of time use, they are identified as employed if they have spent time on a specific set of marginal economic activities mentioned afore.

10. **Employment** comprises all persons ten years of age and above who worked at least one hour during the reference period and were either "paid employed" or "self employed". Persons employed on permanent/regular footings have not worked for any reason during the reference period are also treated as employed, regardless of the duration of the absence or whether workers continued to receive a salary during the absence. The survey obtains information on the duration of absence as well as on other formal job attachment characteristics of workers in paid and self employment. In line with augmented participation rates, a loose upper bound of employment can be drawn up by including the persons engaged in marginal economic activities.

11. **Occupation** means the type of work done during the reference period by the persons employed (or the kind of work done previously if unemployed), irrespective of the industry or the status in employment of the person. It provides description of a person's job. Occupation is classified according to Pakistan Standard Classification of Occupations (PSCO)-2015 based on the International Standard Classification of Occupations, (ISCO)-2008.

12. **Industry** means the activity of the firm, office, establishment or department in which a person is employed or the kind of business, which he/she operates. The activity is defined in terms of the kind of goods produced or services supplied by the unit in which the person works. Industry is classified according to Pakistan Standard Industrial Classification (PSIC) used for national accounts developed in 2010 (Rev-4) on the basis of the International Standard Industrial Classification (ISIC) Rev-4 released by United Nations in 2008.

13. **Self-employment job** is a job where the remuneration is directly dependent upon the profits, or the potential profits, derived from the goods and services produced.

14. **Status in Employment** refers to the type of explicit or implicit contract of employment of the person with other persons or organization. Status of an economically active individual with respect to his employment i.e. whether he/she is an employer, own account worker, employee or contributing family worker is defined as follows:-

15. **Employee** is a person who works for a public or private employer and receives remuneration in wages, salary, commission, tips, piece rates or pay in kind. Employees are divided into

- *Regular paid employees with fixed wage*
- *Casual paid employee*
- *Paid worker by piece rate or work performed*
- *Paid non-family apprentice*

16. **Employer** is a person working during the reference period, on own-account or with one or a few partners at a “self-employment job” with one or more employees engaged on a continuous basis.

17. **Own account worker** is a person working during the reference period, on own-account or with one or more partners at a “self-employment job”, without any employee engaged on a continuous basis; but, possibly, with one or more contributing family workers or employees engaged on an occasional basis. It includes owner cultivator, share cropper and contract cultivator.

18. **Contributing family worker** is a person who works without pay in cash or in kind on an enterprise operated by a member of his/her household or other related persons.

19. **Other** includes member of a producer’s cooperative, etc.

20. **Informal Sector** in Pakistan is formulated in terms of household enterprise and size of employment. For statistical purpose, the provenance of employment in informal sector is given as follows:

- All household enterprises owned and operated by own-account workers, irrespective of the size of the enterprise (informal own-account enterprises),
- Enterprises owned and operated by employers with less than 10 persons engaged. It includes the owner (s) of the enterprise, the contributing family workers, the employees, whether employed on an occasional or a continuous basis, or as an apprentice, and
- Excluded are all enterprises engaged in agricultural activities or wholly engaged in non-market production.

21. **Household Enterprise** or equivalently, an unincorporated enterprise, is a production unit that does not have a separate legal entity independent of the household(s) or household members that own it. It is neither a corporation nor has a complete set of accounts that would permit a clear distinction between the production activities of the enterprise from the other activities of the owner(s) i.e. it is not a quasi-corporation.

22. **Unemployment** in AJ & K comprises all persons ten years of age and above who during the reference period were:

- i) **“Without work”** i.e. were not in paid-employment or self-employment; and
- ii) **“Currently available for work”** i.e. were available for paid employment or self-employment: or
- iii) **Not currently available** for the following reasons: illness, will take a job within a month, is temporarily laid off, is an apprentice and is not willing to work: or
- iv) **Seeking work** during last week.

23. **Unemployment rate** is the unemployed population expressed as a percentage of the currently active population.

24. **Multiple job holders** relates to persons who during the reference period carried out more than one economic activity. The survey obtains information about the occupation, industry, status in employment and informal sector characteristics of secondary jobs.

25. **Hours actually worked** relates to the number of hours worked in the main and secondary jobs during the reference period, including any overtime and excluding any absence from work.

26. **Population not currently active** or “persons not in the labour force” comprises all persons who were not employed or unemployed during the reference period and hence not currently active. They are classified into the following categories:-

- a) Attending educational institutions,
- b) Engaged in household duties,
- c) Retired or old age,
- d) Too young to work,
- e) Unable to work/handicapped,
- f) Agricultural landlord and/or property owner; nature of ownership includes land, commercial/residential buildings, cinemas, hotels, petrol pumps, power looms, etc. (given on rent or lease). They are owners but they do not work for their properties,
- g) Others (persons who derive their income solely from royalties, dividends, etc; engaged in immoral pursuits such as prostitutes, beggars, thieves and smugglers etc; voluntary social workers doing work outside the family enterprise, living entirely on charity, etc.)

27. The questionnaire adopted for the Survey is given at Annexure-I.

SECTION- III

SALIENT FEATURES

The LFS 2017-18 estimates are based on the data of 3,719 sample households enumerated through July 2017 to June 2018. Findings are presented in the form of proportions and percentages to provide for all-purpose comparability.

2. In comparison with the preceding LFS 2014-15, a brief account of the survey's main annual estimates, given in the same chronological order (previous verses current), is paragraphed as follows.

Marital Status

3. Marital status (Table-1) consists mainly in the categories of *never married* and *married*. *Widowed* and *divorced* constitute minor part of the configuration. *Never married* scale down (45.7%, 44.3%), *married* scale up (50.9%, 51.6%), while minor increase is observed in the categories of *widows* and *divorced*. See table-1 and Statistical Tables-3 (Annex-II).

Table-1
MARITAL STATUS - DISTRIBUTION OF POPULATION 10 YEARS OF AGE AND ABOVE
(%)

Marital Status	2014-15	2017-18
Never Married	45.7	44.3
Married	50.9	51.6
Widowed	3.2	3.7
Divorced	0.2	0.4
Total	100.0	100.0

Sex Ratio

4. Sex ratio seems to be trending down. Comparative figures of sex ratio declined significantly in overall (105, 94), and almost same points decrease in rural (104, 93) and in urban area (111, 98). The main reason of sharp decline of sex ratio is migration of males in the working age group. Relevant information is presented in the following table Table-2.

Table-2

Literacy

5. Overall Literacy rate (76.6%, 76.8%) and for females (64.9%, 67.3%) scale up while scale down in case of males (88.1%, 86.9%) during the comparative periods. Area-wise rates also suggest increase in the rural areas while goes down in the urban areas. However, male-female disparity seems to be narrowing down with the passage of time. See table-2 below.

Level of Education

6. The comparative shares of literate signify a bit improvement in the profile of educational attainment (76.6%, 76.8%). *Below matric* (47.6%, 46.4%) and *matric but below intermediate* (16.5%, 15.3%) scale down while *Intermediate but less than degree* (6.5%, 6.9%) and *degree and above* (5.9%, 6.5%) scales up. Generally, males are more educated compared to females. See table-4 and Statistical Table-2 (Annex-II). Pare down

Labour Force Participation Rates: Crude

7. Crude participation rate (22.9%) increase as compared to that of previous LFS 2014-15 (22.5%). Area and gender wise rates also goes up. Participation rates in rural area (22.0%, 22.2%) and in urban areas (25.7%, 26.0%) increase almost the same points during the comparative periods. Also, the Labour Force participation rate of males (40.1%, 41.0%) and of females (3.9%, 5.9%) increase in 2017-18 as compared to LFS 2014-15. Male-female disparity seems to be narrowing down the time lane. See table-5 (figure-1) and Statistical Tables-9 and 10 (Annex-II).

APR:- Augmented Participation Rates are based on additional probing questions asked from persons especially females engaged in housekeeping and other related activities.

Labour Force Participation Rates: Refined

8. Generally, refined activity rates follow the pattern of crude participation rates. Refined activity rate (30.5%) scale up in comparison with previous year LFS (28.7%). Comparative rates in the urban (31.9% 33.7%) and in rural areas (28.2%, 29.7%), and that of females (4.9%, 7.9%) and males (52.0%, 54.8%) signify upward trend as compared with the preceding LFS. See table-6 below and Statistical Tables- 9 and 10 (Annex-II).

Note:- * Males augmented activity rates being insignificantly higher than the standard refined rates are therefore not shown in this table.

Labour Force Participation Rates: Age Specific

9. Table-7 (figure 2) presents comparative picture of age specific participation rates (ASPR). As expected, the age intervals between *twenties* and *fifties* (20-59) mark the most productive period of life. As for change during the comparative periods the overall ASPRs increase in the age groups (15-19), (20-24), (25-29), (35-39), (45-49) and (50-54). In the remaining age group, the age specific participation rates scale down. In females, the ASPRs trending up in all age categories except in age groups (35-39) and (40-44) while in male decline is observed in the age group (35-39) and the last two categories. See Statistical Table-9 (Annex-II)

Employed: Major Occupational Groups

11. *Service and sales workers* constitute the largest group (21.3%) of total employed in LFS 2017-18 followed by *elementary occupations* (19.2%), *skilled agricultural & fisher workers* (18.9%), *craft & related trades workers* (13.1%), *professional* (12.6%), *plant/machine operators & assemblers* (7.1%), *Technicians & Associate professionals* (3.2%) , *clerks* (3.0%) and *managers* (1.7%). About eight out of ten females are worked as a professionals (43.3%) and Skilled agricultural, forestry and fishery workers while males seem to be distributed a sort of proportionately in all activities. *Service workers/shop & market sales workers, plant/machine operations & assemblers, clerks* and *professionals* trend down, while the remaining groups trend up. See table-9 (Figure-4) below and Statistical Table-12 (Annex-II).

Employed: Employment Status

12. *Employees* constitute the largest group (52.3%) followed by *own account workers* (40.9%), *contributing family workers* (6.5%) and *employers* (0.3%). Male share is more in the status of employees (52.4%) and own account workers (42.8%) as compared to female share in the same categories (51.3%) and (25.9%) respectively. Females *contributing family workers* (22.8%) are almost six times more than males *contributing family workers* (4.4%). As for change during the comparative periods, all categories seem to be declined except *own account workers* (37.3%, 40.9%). See table-10 and Statistical Table-13 (Annex-II).

Employed: Informal Sector

14. Informal sector accounts for more than seven-tenth (74.1%) of non-agricultural employment, more in rural (75.1%) than in urban areas (71.5%). On the other hand, formal sector activities are concentrated more in urban areas (28.5%) than in rural areas (24.9%). Females are more numerous in rural formal (55.6%) and less in urban formal (51.7%) while males are more numerous in rural informal (77.5%) than in urban informal (75.5%). Employment in Informal sector trend up while formal sector scale down during the comparative periods. See table-12 and Statistical Table-15 (Annex-II).

Major Occupational Groups: Informal Sector

16. Near one-third (31.6%) are reported as *service and sales workers*, while one-fifth each comprises *craft & related trades workers* (21.1%) and one-fourth *elementary (unskilled) occupations* (26.5%). The percentages of remaining groups are in descending order. *Plant/machine operators & assemblers* (10.1%), *professionals* (7.3%) and managers (1.5%). More than three-sixth (53.8%) of females compared to about one in twenty (4.5%) of males are engaged in *professionals*. *In the rest of categories share of females* are also lower compared to respective shares of males. A mixed pattern of changes in the shares of groups obtains during the comparative period. See table-14 and Statistical Table-17 (Annex-II).

Employment Status: Informal Sector

17. The employment status mainly consists in the categories of *employees* (51.9%) and *own account workers* (42.0%). The former constitutes the largest share of females (55.7%) and latter, of males (43.0%). About one in seventeen workers (5.6%) are reported as *contributing family worker*, while *employers are only (0.5%) of total employed workers..* As far change during the comparative periods, *employees* and *contributing family workers* seem to be trending up while reverse trend is seen in *employers* and *own account workers* categories. Unemployment Rates: Overall

18. Overall unemployment rate (10.3%) fares a bit lower than that of the previous survey (11.2%). Similar configuration obtains in the case of males (9.4%, 8.4%) and in rural (11.4%, 10.1%) areas. However, in case of females the fall in the *unemployment rate* is more significant both in rural and urban areas. See table-16 and Statistical Table-9 (Annex-II).
